

Software Maintenance Service

The Aperto® Software Maintenance Service is designed for clients who wish to be updated with the latest functionality and features that Aperto implements into consecutive versions of product software and documentation. With this service, the client gains increased flexibility to improve the management of their network and achieve higher performance as well as reduce cost.

The key features of this service include:

- Regular updates providing advance notification of future software releases and detailed feature information to assist with network software planning.
- The client receives all major, minor and maintenance releases for products covered under the service agreement.
- The client can choose whether they want to receive software on CD or electronically, via our Web site (username and password is assigned in such cases).
